

How to install Sophos product (Common steps)  
【For Mac OS】

Creation date : 2024-04-24

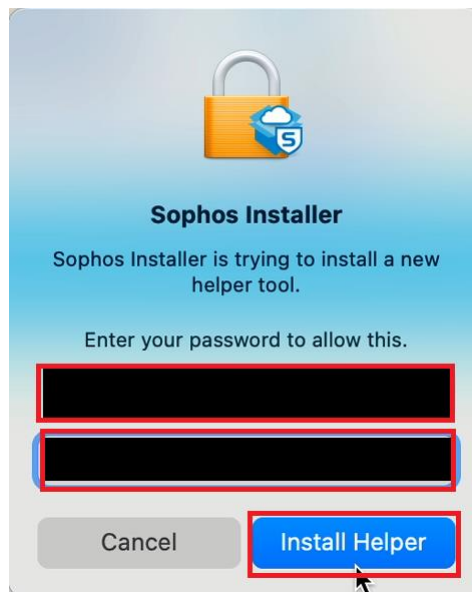

(i)

Click [Install].

(ii)

If you receive the message: *Sophos Installer is trying to install a new helper tool. Enter your password to allow this.*, enter administrator<sup>1</sup> name and password, and click [Install Helper].

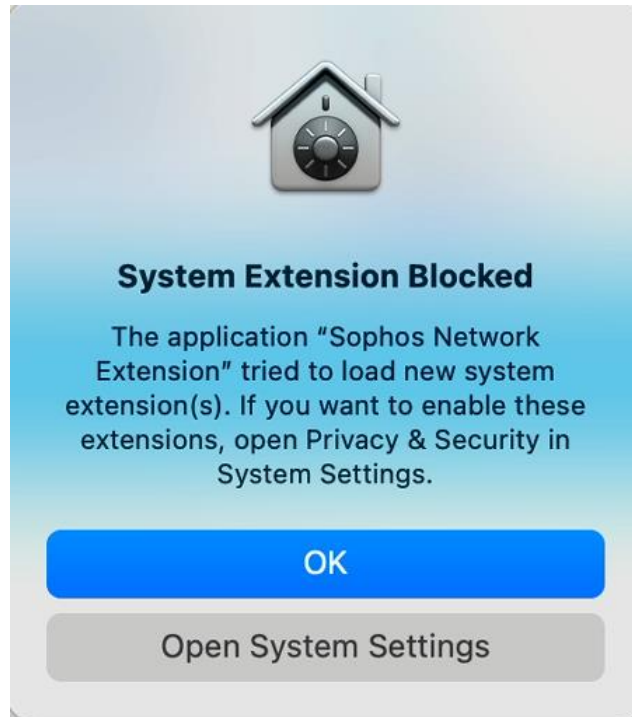

<sup>1</sup> administrator <https://support.apple.com/guide/mac-help/aside/gloscdf7f3c>

(iii)

Consider referring to the following page and following the steps in the following page. For example, if during installation a prompt will show to allow the System Extensions for Sophos Network Extension, refer to the following page and follow the steps in the following page.

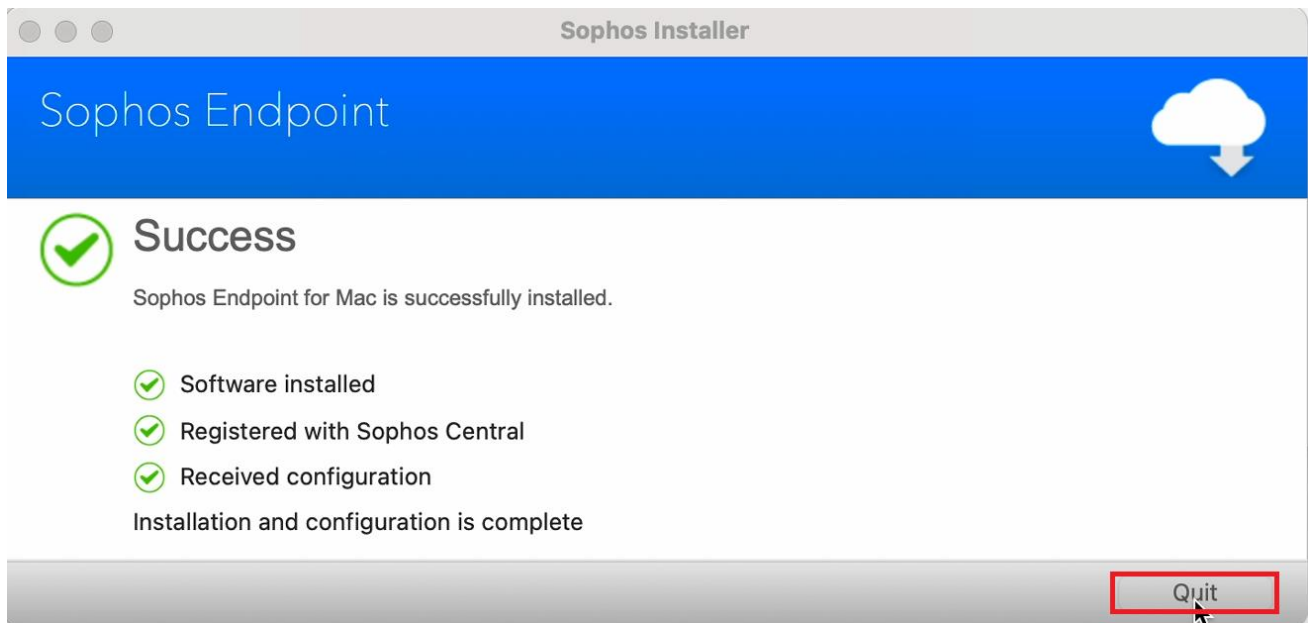

macOS System Extensions
