

How to install Sophos product(Sophos Security software) on university-owned PC
【For Mac OS】

****IMPORTANT NOTICE****

- Please do the procedures **** inside the campus ****.
Especially, when you install Sophos, you are required to connect your PC to the campus-LAN, directly. You cannot complete the installation procedure outside the campus by use of SSL-VPN.
- You can start installation of Sophos in March, 2020.
(We do not need to mind its licence issue.)

Notes:

- 1) Please UNINSTALL SEP software before installation of Sophos.
- 2) The installation procedure of Sophos is possible only inside the campus, in order to exploit TTInstaller service.
- 3) Installation procedure of Sophos for individually-owned PC is different from that for university-owned PCs.
- 4) Installation procedure of Sophos is different for some of university-owned PCs. Please refer another guide(s) provided from the corresponding department(s)/section(s).

1 Check system requirements

Go to the following page and make sure that the PC on which you want to install meets system requirements.

Sophos Central Mac Endpoint System Requirements

<https://community.sophos.com/kb/en-us/118623>
