

How to install Sophos product(Sophos Security software) on individually-owned PC
【For Windows Operating Systems】

****IMPORTANT NOTICE****

- Please do the procedures **** inside the campus ****.

Especially, when you install Sophos, you are required to connect your PC to the campus-LAN, directly. You cannot complete the installation procedure outside the campus by use of SSL-VPN.

- If you cannot do the tasks of the installation inside the campus and the operations system of the PC is Windows, consider use Windows Defender.

Notes:

1) Please UNINSTALL Security software, e.g. Sophos product of the previous version and SEP, before installation of Sophos product of this year's version.

2) The installation procedure of Sophos is possible only inside the campus, in order to exploit TTInstaller service.

As described 3.7 ~ 3.9 restart the computer after Exit TTInstaller.

1 Check system requirements

Go to the following page and make sure that the PC on which you want to install meets system requirements.

Sophos Central Windows Endpoint System Requirements

<https://community.sophos.com/kb/en-us/121027>

Sophos Central Windows Server System Requirements

<https://community.sophos.com/kb/en-us/119802>
