How to install Sophos product(Sophos Security software) on individually-owned PC [For Windows Operating Systems]

IMPORTANT NOTICE

Please do the procedures ** inside the campus **.
Especially, when you install Sophos, you are required to connect your PC to the campus-LAN, directly. You cannot complete the installation procedure outside the campus by use of SSL-VPN.

- If you cannot do the tasks of the installation inside the campus and the operations system of the PC is Windows, consider use Windows Defender.

Notes:

1) Please UNINSTALL Security software, e.g. Sophos product of the previous version and SEP, before installation of Sophos product of this year's version.

2) The installation procedure of Sophos is possible only inside the campus, in order to exploit TTInstaller service. 1 Check system requirements

Go to the following page and make sure that the PC on which you want to install mee ts system requirements.

Sophos Central Windows Endpoint System Requirements https://community.sophos.com/kb/en-us/121027 Sophos Central Windows Server System Requirements

https://community.sophos.com/kb/en-us/119802

2 Download TTInstaller for Windows

Go to the following page and download TTInstaller for Windows.

TTInstaller(Windows 版)をダウンロードする方法 / How to download TTInstaller for Windows ws

http://www.officesoft.gsic.titech.ac.jp/pdf/How_to_download_TTInstaller_for_Windows.pdf

- 3 Install Sophos productⁱ
 - 3.1

Follow steps in the following page.

How to execute TTInstaller for Windows (Common steps)

http://www.officesoft.gsic.titech.ac.jp/pdf/How to execute TTInstaller for Windows co mmon steps en.pdf
